Introduction

- About This Book
- Foolish Assumptions
- Icons Used in This Book
- Beyond the Book
- Where to Go from Here

Book 1: Getting Started with Coding

- Chapter 1: What Is Coding?
  - Defining What Code Is
  - Understanding What Coding Can Do for You
  - Surveying the Types of Programming Languages
  - Taking a Tour of a Web App Built with Code
- Chapter 2: Programming for the Web
  - Displaying Web Pages on Your Desktop and Mobile Device
  - Coding Web Applications
  - Coding Mobile Applications
  - Deploying Web Applications in the Cloud
- Chapter 3: Becoming a Programmer

Writing Code Using a Process

Picking Tools for the Job

Book 2: Basic Web Coding

Chapter 1: Exploring Basic HTML

What Does HTML Do?

Understanding HTML Structure

Getting Familiar with Common HTML Tasks and Elements

Styling Me Pretty

Building Your First Website Using HTML

Chapter 2: Getting More Out of HTML

Organizing Content on the Page

Listing Data

Putting Data in Tables

Filling Out Forms

Practicing More with HTML

Chapter 3: Getting Stylish with CSS

What Does CSS Do?

CSS Structure

Common CSS Tasks and Selectors

Getting Stylish

Chapter 4: Next Steps with CSS

Styling (More) Elements on Your Page

Selecting Elements to Style

Aligning and Laying Out Your Elements

Writing More Advanced CSS

Chapter 5: Responsive Layouts with Flexbox

Introducing Responsive Design

Using Flexbox

Experimenting with Flexbox

Chapter 6: Styling with Bootstrap

Figuring Out What Bootstrap Does

Installing Bootstrap

Understanding the Layout Options

Coding Basic Web Page Elements

Practicing with Bootstrap

Book 3: Advanced Web Coding

Chapter 1: What Is JavaScript?

What Is JavaScript?

JavaScript Grows Up

Why JavaScript?

Chapter 2: Writing Your First JavaScript Program

Setting Up Your Development Environment

Reading JavaScript Code

Running JavaScript in the Browser Window

Using the JavaScript Developer Console

Commenting Your Code

Chapter 3: Working with Variables

Understanding Variables

Initializing Variables

Understanding Global and Local Scope

Naming Variables

Creating Constants Using the const Keyword

Working with Data Types

Chapter 4: Understanding Arrays

Making a List

Array Fundamentals

Creating Arrays

Populating Arrays

Understanding Multidimensional Arrays

Accessing Array Elements

Chapter 5: Working with Operators, Expressions, and Statements

Express Yourself

Hello, Operator

Types of Operators

Chapter 6: Getting into the Flow with Loops and Branches

Branching Out

Here We Go: Loop De Loop

Chapter 7: Getting Functional

Understanding the Function of Functions

Using Function Terminology

The Benefits of Using Functions

Writing Functions

Returning Values

Passing and Using Arguments

Understanding Function Scope

Creating Anonymous Functions

Doing it Again with Recursion

Functions within Functions

Chapter 8: Making and Using Objects

Object of My Desire

Creating Objects

Retrieving and Setting Object Properties

Deleting Properties

Working with Methods

An Object-Oriented Way to Become Wealthy: Inheritance

Chapter 9: Controlling the Browser with the Window Object

Understanding the Browser Environment

Investigating the BOM

Chapter 10: Manipulating Documents with the DOM

Understanding the DOM

Understanding Node Relationships

Using the Document Object’s Properties and Methods

Using the Element Object's Properties and Methods

Working with the Contents of Elements

Getting Elements by ID, Tag Name, or Class

Using the Attribute Object's Properties

Creating and Appending Elements

Removing Elements

Chapter 11: Using Events in JavaScript

Knowing Your Events

Handling Events

Chapter 12: Integrating Input and Output

Understanding HTML Forms

Working with the Form Object

Chapter 13: Understanding Callbacks and Closures

What Are Callbacks?

Understanding Closures

Using Closures

Chapter 14: Embracing AJAX and JSON

Working behind the Scenes with AJAX

Putting Objects in Motion with JSON

Book 4: Creating Mobile Apps

Chapter 1: What Is Flutter?

All About Hardware and Software

Where Does Flutter Fit In?

Enough New Terminology! What's Next?

Chapter 2: Setting Up Your Computer for Mobile App Development

The Stuff You Need

What to Do

Dealing with the Devil's Details

Divisiveness Among Devices

Using Android Studio

Running This Book's Sample Programs

Chapter 3: “Hello” from Flutter

First Things First: Creating a Flutter Project

Classes, Objects, and Widgets

Making Things Look Nicer

Hey, Wait a Minute …

Chapter 4: Hello Again

Creating and Using a Function

Programming in Dart: The Small Stuff

Creating Function Declaration Variations

More Fun to Come!

Chapter 5: Making Things Happen

Let's All Press a Floating Action Button

Enhancing Your App

Whew!

Chapter 6: Laying Things Out

Understanding the Big Picture

Nesting Rows and Columns

Introducing More Levels of Nesting

Using the Expanded Widget

How Big Is My Device?

Chapter 7: Interacting with the User

A Simple Switch

Wait For It!

How Much Do You Love Flutter?

Dealing with Text Fields

Creating Radio Buttons

Creating a Drop-Down Button

Onward and Upward

Chapter 8: Navigation, Lists, and Other Goodies

Extending a Dart Class

Navigating from One Page to Another

Passing Data from the Source to a Destination

Passing Data Back to the Source

Passing Data in Both Directions

Creating Named Routes

Creating a List

Fetching Data from the Internet

What’s Next?

Chapter 9: Moving Right Along …

Setting the Stage for Flutter Animation

Moving Along a Straight Line

Bouncing Around

Animating Size and Color Changes

Moving Along a Curve

Dragging Things Around

Tearing Things Up

Book 5: Getting Started with Python

Chapter 1: Wrapping Your Head around Python

What Does Python Do?

Defining Python Structure

Coding Common Python Tasks and Commands

Shaping Your Strings

Chapter 2: Installing a Python Distribution

Using Anaconda

Installing Anaconda on Linux

Installing Anaconda on macOS X

Installing Anaconda on Windows

Downloading the Data Sets and Example Code

Chapter 3: Working with Real Data

Uploading, Streaming, and Sampling Data

Accessing Data in Structured Flat-File Form

Sending Data in Unstructured File Form

Managing Data from Relational Databases

Interacting with Data from NoSQL Databases

Accessing Data from the Web

Book 6: Data Analysis with Python

Chapter 1: Conditioning Your Data

Juggling between NumPy and pandas

Validating Your Data

Manipulating Categorical Variables

Dealing with Dates in Your Data

Dealing with Missing Data

Slicing and Dicing: Filtering and Selecting Data

Concatenating and Transforming

Aggregating Data at Any Level

Chapter 2: Shaping Data

Working with HTML Pages

Working with Raw Text

- Using the Bag of Words Model and Beyond
- Working with Graph Data

Chapter 3: Getting a Crash Course in MatPlotLib

- Starting with a Graph
- Setting the Axis, Ticks, Grids
- Defining the Line Appearance
- Using Labels, Annotations, and Legends

Chapter 4: Visualizing the Data

- Choosing the Right Graph
- Creating Advanced Scatterplots
- Plotting Time Series
- Visualizing Graphs

Book 7: Career Building with Coding

Chapter 1: Exploring Coding Career Paths

- Augmenting Your Existing Job
- Finding a New Coding Job

Chapter 2: Exploring Undergraduate and Graduate Degrees

- Getting a College Degree
- Enrolling in an Advanced Degree Program
- Interning to Build Credibility

Chapter 3: Training on the Job

- Taking a Work Project to the Next Level
- Learning on the Job and After Work
- Freelancing to Build Confidence and Skills
- Transitioning to a New Role

Chapter 4: Coding Career Myths

- You Must Be Good at Math
- You Must Have Studied Engineering
- You Can Learn Coding in a Few Weeks
- You Need a Great Idea to Start Coding
- Ruby Is Better than Python
- Only College Graduates Receive Coding Offers
- You Must Have Experience

Tech Companies Don’t Hire Women or Minorities
The Highest Paying Coding Jobs Are in San Francisco
Your Previous Experience Isn’t Relevant
