About the Technical Reviewerxxxiii

■Part I 1

■Chapter 1: Putting ASP.NET Core in Context 3

 Understanding the Application Frameworks 4

 Understanding the MVC Framework.....5

 Understanding Razor Pages5

 Understanding Blazor6

 Understanding the Utility Frameworks..... 6

 Understanding the ASP.NET Core Platform 6

 Understanding This Book 7

 What Software Do I Need to Follow the Examples?.....7

 What Platform Do I Need to Follow the Examples?7

 What If I Have Problems Following the Examples?.....7

 What If I Find an Error in the Book?8

 What Does This Book Cover?8

 What Doesn't This Book Cover?.....9

 How Do I Contact the Author?.....9

 What If I Really Enjoyed This Book?.....10

 What If This Book Has Made Me Angry and I Want to Complain?10

Summary..... 10

■ Chapter 2: Getting Started	11
Choosing a Code Editor	11
Installing Visual Studio	12
Installing Visual Studio Code	15
Creating an ASP.NET Core Project	19
Opening the Project Using Visual Studio.....	21
Opening the Project with Visual Studio Code.....	22
Running the ASP.NET Core Application	24
Understanding Endpoints	25
Understanding Routes	27
Understanding HTML Rendering.....	27
Putting the Pieces Together	32
Summary	32
■ Chapter 3: Your First ASP.NET Core Application	33
Setting the Scene	33
Creating the Project.....	33
Preparing the Project.....	34
Adding a Data Model	36
Creating a Second Action and View	37
Linking Action Methods	38
Building the Form	39
Receiving Form Data	41
Adding the Thanks View	44
Displaying the Responses.....	45
Adding Validation	47
Styling the Content	53
Summary	58

■ Chapter 4: Using the Development Tools	59
Creating ASP.NET Core Projects.....	59
Creating a Project Using the Command Line	60
Adding Code and Content to Projects.....	63
Understanding Item Scaffolding	65
Building and Running Projects	65
Using the Hot Reload Feature	67
Building and Running Projects Using Visual Studio Code.....	69
Building and Running Projects Using Visual Studio	69
Managing Packages	69
Managing NuGet Packages.....	69
Managing Tool Packages	70
Managing Client-Side Packages.....	71
Debugging Projects	73
Summary	74
■ Chapter 5: Essential C# Features.....	75
Preparing for This Chapter	76
Opening the Project	76
Enabling the MVC Framework	76
Creating the Application Components	77
Selecting the HTTP Port.....	78
Running the Example Application	79
Understanding Top-Level Statements	80
Understanding Global using Statements	80
Understanding Implicit using Statements	82
Understanding Null State Analysis	82
Ensuring Fields and Properties Are Assigned Values.....	84
Using Nullable Types.....	85
Checking for Null Values.....	86

Overriding Null State Analysis	89
Disabling Null State Analysis Warnings	90
Using String Interpolation.....	91
Using Object and Collection Initializers	91
Using an Index Initializer	93
Using Target-Typed New Expressions	94
Pattern Matching	94
Pattern Matching in switch Statements	95
Using Extension Methods	96
Applying Extension Methods to an Interface	98
Creating Filtering Extension Methods.....	100
Using Lambda Expressions	101
Defining Functions.....	103
Using Lambda Expression Methods and Properties	106
Using Type Inference and Anonymous Types.....	108
Using Anonymous Types	108
Using Default Implementations in Interfaces	110
Using Asynchronous Methods	112
Working with Tasks Directly	112
Applying the async and await Keywords.....	114
Using an Asynchronous Enumerable	115
Getting Names.....	118
Summary.....	119
■ Chapter 6: Testing ASP.NET Core Applications.....	121
Preparing for This Chapter	122
Opening the Project	122
Selecting the HTTP Port.....	123
Enabling the MVC Framework	123
Creating the Application Components	124
Running the Example Application.....	126

Creating a Unit Test Project	126
Removing the Default Test Class	127
Writing and Running Unit Tests	127
Running Tests with the Visual Studio Test Explorer	129
Running Tests with Visual Studio Code.....	130
Running Tests from the Command Line.....	131
Correcting the Unit Test	131
Isolating Components for Unit Testing	133
Using a Mocking Package	138
Creating a Mock Object	138
Summary	140
■ Chapter 7: SportsStore: A Real Application	141
Creating the Projects.....	142
Creating the Unit Test Project	142
Opening the Projects	143
Configuring the HTTP Port	143
Creating the Application Project Folders	144
Preparing the Application Services and the Request Pipeline.....	144
Configuring the Razor View Engine	145
Creating the Controller and View	146
Starting the Data Model.....	147
Checking and Running the Application.....	147
Adding Data to the Application	148
Installing the Entity Framework Core Packages	148
Defining the Connection String.....	149
Creating the Database Context Class	150
Configuring Entity Framework Core.....	150
Creating a Repository	151
Creating the Database Migration.....	153
Creating Seed Data.....	153

Displaying a List of Products.....	156
Preparing the Controller	156
Updating the View.....	158
Running the Application.....	159
Adding Pagination	160
Displaying Page Links.....	161
Improving the URLs	170
Styling the Content.....	172
Installing the Bootstrap Package.....	172
Applying Bootstrap Styles.....	173
Creating a Partial View	175
Summary	176
■ Chapter 8: SportsStore: Navigation and Cart.....	177
Adding Navigation Controls	177
Filtering the Product List	177
Refining the URL Scheme	182
Building a Category Navigation Menu	186
Correcting the Page Count.....	194
Building the Shopping Cart.....	197
Configuring Razor Pages	198
Creating a Razor Page	199
Creating the Add To Cart Buttons.....	200
Enabling Sessions	202
Implementing the Cart Feature.....	203
Summary	214
■ Chapter 9: SportsStore: Completing the Cart	215
Refining the Cart Model with a Service.....	215
Creating a Storage-Aware Cart Class	215
Registering the Service	217
Simplifying the Cart Razor Page.....	218

Completing the Cart Functionality	221
Removing Items from the Cart.....	221
Adding the Cart Summary Widget	223
Submitting Orders	226
Creating the Model Class.....	226
Adding the Checkout Process.....	227
Creating the Controller and View	228
Implementing Order Processing	231
Completing the Order Controller	234
Displaying Validation Errors.....	238
Displaying a Summary Page.....	240
Summary	241
■ Chapter 10: SportsStore: Administration	243
Preparing Blazor Server	243
Creating the Imports File	244
Creating the Startup Razor Page	245
Creating the Routing and Layout Components	245
Creating the Razor Components	247
Checking the Blazor Setup	247
Managing Orders	248
Enhancing the Model.....	249
Displaying Orders to the Administrator	250
Adding Catalog Management	253
Expanding the Repository.....	254
Applying Validation Attributes to the Data Model	255
Creating the List Component	256
Creating the Detail Component.....	258
Creating the Editor Component.....	260
Deleting Products	263
Summary	265

- **Chapter 11: SportsStore: Security and Deployment** 267
 - Creating the Identity Database 267
 - Installing the Identity Package for Entity Framework Core 267
 - Creating the Context Class 268
 - Defining the Connection String..... 268
 - Configuring the Application 269
 - Creating and Applying the Database Migration 270
 - Defining the Seed Data..... 271
 - Adding a Conventional Administration Feature 273
 - Applying a Basic Authorization Policy 275
 - Creating the Account Controller and Views 276
 - Testing the Security Policy 280
 - Preparing ASP.NET Core for Deployment 280
 - Configuring Error Handling 281
 - Creating the Production Configuration Settings 283
 - Creating the Docker Image 283
 - Running the Containerized Application..... 286
 - Summary 288
- **Part II**..... 289
 - **Chapter 12: Understanding the ASP.NET Core Platform**..... 291
 - Preparing for This Chapter 292
 - Running the Example Application 293
 - Understanding the ASP.NET Core Platform 294
 - Understanding Middleware and the Request Pipeline..... 294
 - Understanding Services..... 294
 - Understanding the ASP.NET Core Project 295
 - Understanding the Entry Point..... 296
 - Understanding the Project File 298

Creating Custom Middleware	299
Defining Middleware Using a Class	302
Understanding the Return Pipeline Path.....	304
Short-Circuiting the Request Pipeline	306
Creating Pipeline Branches	307
Creating Terminal Middleware.....	309
Configuring Middleware	311
Using the Options Pattern with Class-Based Middleware	314
Summary	315
■ Chapter 13: Using URL Routing.....	317
Preparing for This Chapter	318
Understanding URL Routing.....	321
Adding the Routing Middleware and Defining an Endpoint	321
Simplifying the Pipeline Configuration	325
Understanding URL Patterns.....	326
Using Segment Variables in URL Patterns	327
Generating URLs from Routes.....	331
Managing URL Matching	334
Matching Multiple Values from a Single URL Segment.....	335
Using Default Values for Segment Variables.....	336
Using Optional Segments in a URL Pattern.....	337
Using a catchall Segment Variable	339
Constraining Segment Matching	340
Defining Fallback Routes	344
Advanced Routing Features	345
Creating Custom Constraints	345
Avoiding Ambiguous Route Exceptions.....	346
Accessing the Endpoint in a Middleware Component	349
Summary	351

■ Chapter 14: Using Dependency Injection	353
Preparing for This Chapter	354
Creating a Middleware Component and an Endpoint	355
Configuring the Request Pipeline	356
Understanding Service Location and Tight Coupling	357
Understanding the Service Location Problem	358
Understanding the Tightly Coupled Components Problem	359
Using Dependency Injection	361
Using a Service in a Middleware Class	363
Using a Service in an Endpoint	364
Using Service Lifecycles	370
Creating Transient Services	370
Avoiding the Transient Service Reuse Pitfall	372
Using Scoped Services	374
Other Dependency Injection Features	380
Creating Dependency Chains	381
Accessing Services in the Program.cs File	383
Using Service Factory Functions	384
Creating Services with Multiple Implementations	386
Using Unbound Types in Services	388
Summary	389
■ Chapter 15: Using the Platform Features, Part 1	391
Preparing for This Chapter	392
Using the Configuration Service	393
Understanding the Environment-Specific Configuration File	394
Accessing Configuration Settings	395
Using the Configuration Data in the Program.cs File	396
Using Configuration Data with the Options Pattern	397
Understanding the Launch Settings File	399
Using the Environment Service	404
Storing User Secrets	405

Using the Logging Service.....	409
Generating Logging Messages	409
Logging Messages with Attributes	413
Configuring Minimum Logging Levels	414
Logging HTTP Requests and Responses	416
Using Static Content and Client-Side Packages.....	419
Adding the Static Content Middleware	419
Using Client-Side Packages.....	423
Summary.....	425
■ Chapter 16: Using the Platform Features, Part 2	427
Preparing for This Chapter	427
Using Cookies.....	428
Enabling Cookie Consent Checking	431
Managing Cookie Consent.....	433
Using Sessions	435
Configuring the Session Service and Middleware.....	435
Using Session Data.....	438
Working with HTTPS Connections	439
Enabling HTTPS Connections.....	440
Detecting HTTPS Requests	441
Enforcing HTTPS Requests	442
Enabling HTTP Strict Transport Security	444
Handling Exceptions and Errors	446
Returning an HTML Error Response	447
Enriching Status Code Responses.....	450
Filtering Requests Using the Host Header.....	452
Summary.....	454

- **Chapter 17: Working with Data 455**
 - Preparing for This Chapter 456
 - Caching Data 457
 - Caching Data Values 458
 - Using a Shared and Persistent Data Cache 462
 - Caching Responses 466
 - Using Entity Framework Core 468
 - Installing Entity Framework Core 469
 - Creating the Data Model 470
 - Configuring the Database Service 471
 - Creating and Applying the Database Migration 472
 - Seeding the Database 473
 - Using Data in an Endpoint 476
 - Summary 478
- **Part III 479**
- **Chapter 18: Creating the Example Project 481**
 - Creating the Project 481
 - Adding a Data Model 482
 - Adding NuGet Packages to the Project 482
 - Creating the Data Model 483
 - Preparing the Seed Data 485
 - Configuring Entity Framework Core Services and Middleware 486
 - Creating and Applying the Migration 487
 - Adding the CSS Framework 487
 - Configuring the Request Pipeline 488
 - Running the Example Application 489
 - Summary 489

■ Chapter 19: Creating RESTful Web Services	491
Preparing for This Chapter	492
Understanding RESTful Web Services	493
Understanding Request URLs and Methods	493
Understanding JSON.....	494
Creating a Web Service Using the Minimal API	494
Creating a Web Service Using a Controller.....	497
Enabling the MVC Framework	498
Creating a Controller.....	499
Improving the Web Service	509
Using Asynchronous Actions.....	510
Preventing Over-Binding.....	511
Using Action Results	513
Validating Data	519
Applying the API Controller Attribute	520
Omitting Null Properties	522
Summary	526
■ Chapter 20: Advanced Web Service Features	527
Preparing for This Chapter	528
Dropping the Database	529
Running the Example Application	529
Dealing with Related Data.....	530
Breaking Circular References in Related Data	532
Supporting the HTTP PATCH Method	533
Understanding JSON Patch.....	533
Installing and Configuring the JSON Patch Package	534
Defining the Action Method	535
Understanding Content Formatting	537
Understanding the Default Content Policy	537
Understanding Content Negotiation.....	539

Specifying an Action Result Format.....	544
Requesting a Format in the URL.....	545
Restricting the Formats Received by an Action Method.....	546
Documenting and Exploring Web Services.....	548
Resolving Action Conflicts	548
Installing and Configuring the Swashbuckle Package.....	550
Fine-Tuning the API Description	552
Summary.....	556
■ Chapter 21: Using Controllers with Views, Part I	557
Preparing for This Chapter	558
Dropping the Database	559
Running the Example Application.....	559
Getting Started with Views	560
Configuring the Application	560
Creating an HTML Controller.....	561
Creating a Razor View.....	564
Selecting a View by Name	567
Working with Razor Views.....	571
Setting the View Model Type.....	575
Understanding the Razor Syntax	580
Understanding Directives	581
Understanding Content Expressions.....	581
Setting Element Content.....	582
Setting Attribute Values	584
Using Conditional Expressions.....	585
Enumerating Sequences.....	589
Using Razor Code Blocks.....	591
Summary.....	593

■ Chapter 22: Using Controllers with Views, Part II	595
Preparing for This Chapter	595
Dropping the Database	597
Running the Example Application	597
Using the View Bag	598
Using Temp Data	600
Working with Layouts	603
Configuring Layouts Using the View Bag	605
Using a View Start File	606
Overriding the Default Layout	608
Using Layout Sections	612
Using Partial Views	619
Enabling Partial Views	619
Creating a Partial View	620
Applying a Partial View	620
Understanding Content-Encoding	624
Understanding HTML Encoding	624
Understanding JSON Encoding	626
Summary	627
■ Chapter 23: Using Razor Pages	629
Preparing for This Chapter	630
Running the Example Application	630
Understanding Razor Pages	631
Configuring Razor Pages	632
Creating a Razor Page	633
Understanding Razor Pages Routing	638
Specifying a Routing Pattern in a Razor Page	640
Adding Routes for a Razor Page	642

Understanding the Page Model Class.....	643
Using a Code-Behind Class File.....	644
Understanding Action Results in Razor Pages.....	647
Handling Multiple HTTP Methods	651
Selecting a Handler Method	653
Understanding the Razor Page View	655
Creating a Layout for Razor Pages	656
Using Partial Views in Razor Pages	658
Creating Razor Pages Without Page Models.....	659
Summary.....	661
■ Chapter 24: Using View Components	663
Preparing for This Chapter	664
Dropping the Database	666
Running the Example Application	666
Understanding View Components	667
Creating and Using a View Component	667
Applying a View Component.....	668
Understanding View Component Results	672
Returning a Partial View	673
Returning HTML Fragments.....	676
Getting Context Data	678
Providing Context from the Parent View Using Arguments.....	680
Creating Asynchronous View Components	685
Creating View Components Classes	687
Creating a Hybrid Controller Class.....	690
Summary.....	692
■ Chapter 25: Using Tag Helpers	693
Preparing for This Chapter	694
Dropping the Database	696
Running the Example Application	696
